

<b>EDUCATION</b>	<p><b>Columbia University</b>  <i>M.S. Computer Science (Machine Learning Track)</i></p> <ul style="list-style-type: none"> <li>• Coursework included: artificial intelligence, machine learning, advanced topics in neural networks and deep learning, advanced topics in spoken language processing and speech recognition, natural language processing, computer vision, databases, and analysis of algorithms.</li> <li>• Conducted research advised by Professor Peter Belhumeur on developing self-supervised optical character recognition model whose training procedure is guided by separate language model via student-teacher knowledge distillation paradigm without use of ground-truth labels.</li> </ul> <p><i>B.A. Drama and Theatre Arts</i></p>	<p>New York, NY  Dec. 2022</p> <p>May 2018</p>
<b>EXPERIENCE</b>	<p><b>TikTok/ByteDance</b>  <i>Research Scientist</i>  <i>Speech Synthesis Engineer</i>  <i>Software Engineer Intern</i></p> <ul style="list-style-type: none"> <li>• Conduct research on <a href="#">Seed/Doubao</a> team (previously Speech, Audio, and Music Intelligence) on state-of-the-art neural speech synthesis and audio processing algorithms for various TikTok and ByteDance products to empower content creation and consumption.</li> </ul>	<p>San Jose, CA  Jul. 2024 – Present  Dec. 2022 – Jun. 2024  May 2022 – Nov. 2022</p>
<b>RESEARCH</b>	<p>My research interests include deep generative modeling, self-supervised representation and transfer learning, zero-shot learning, and knowledge distillation. I’m especially interested in neural end-to-end learning for audio and natural language processing tasks.</p>
